

MY STUDY PLAN(EDITION)

There is a wide mixture of cultures in KIT and there are foreign communities from most parts of the world. It is not who we make mistakes, but we have to correct them that define us. To improve all of those subject I need to have my study plan if not I won't be able to achieve my goal in four years later. Now here is a difference from my high school. I have to change my plan and add more plans to be successful my goal no matter how hard is it. like when I was in high school I had my own study plan so, I have completed the international examination and I had a good grade also. But my English speaking is so bad so that's why I have to ask my lecture while he/she is teaching. I will try my best to complete it and improve myself to be a diligent student as I can no matter what. During class when lecture explains for some good points so, I have to have my own note book and note all of those good points. So, I have to be strong to ask them about that problem no matter how my English speaking bad or good. I sometime don't have confidence to ask them, because am afraid.
